Professional Summary

MCA student (CGPA: 7.0) with experience in Python, AI/ML, and web application development. Worked on projects related to deepfake detection, digital content quality analysis, and stack operation management using technologies such as Flask, TensorFlow, OpenCV, CNN, and LSTM. Completed an AI/ML internship with hands-on exposure to machine learning models, data preprocessing, and model evaluation.

Education

Master of Computer Applications (MCA) | RNS Institute of Technology | CGPA: **7.0** | **2025-2027**

Bachelor of Computer Applications (BCA) | KLE Society's Degree College | CGPA: **7.5** | **2022-2025**

Technical Skills

Programming: Python, Java, SQL, HTML, CSS

Frameworks: Flask, Streamlit, Bootstrap

AI/ML: TensorFlow, Scikit-learn, OpenCV, CNN, LSTM

Tools: Git, VS Code, IntelliJ

Core Concepts: DSA, OOPS, DBMS, SDLC

Projects

Advanced Deepfake Detection using CNN + LSTM.

Technologies Used: Python, CNN, LSTM, OpenCV, Flask.

- Developed a CNN + LSTM-based deepfake detection system achieving accurate manipulated media classification.
- Implemented CNN and LSTM algorithms for media analysis and classification.
- Designed a GUI interface to display prediction results effectively.

Stack Operation Manager.

Technologies Used: Java, HTML, CSS, JavaScript.

- Developed an application to perform stack operations such as push, pop, and peek.
- Implemented stack data structure concepts using Java.
- Improved understanding of stack operations through an interactive system.

Digital Education Content Quality System.

Technologies Used: Python, Machine Learning, Flask.

- Developed a system to evaluate and manage the quality of digital educational content.
- Implemented automated analysis techniques for content assessment.
- Designed a user-friendly interface for efficient content monitoring and reporting.

Internship

AADVI GROUPS OF COMPANIES | AI/ML Intern.

Duration: 2 Months

- Worked with Python libraries including NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, and OpenCV.
- Implemented supervised and unsupervised machine learning algorithms such as, Decision Trees, Random Forest, and K-Means Clustering.
- Developed a mini-project using Random Forest Regressor to predict vehicle speed and braking distance based on weather condition.
- Applied data preprocessing, hyperparameter tuning, and model evaluation techniques such as RMSE.
- Strengthened practical skills in building, training, and deploying machine learning models.

Achievements

Participated in Ideathon of Ignitron 2025 conducted by GM University Davanagere, and presenting ideas related to cybersecurity and phishing detection.

Personal Intrests

Artificial Intelligence & Machine Learning, Full Stack Web Development.
